FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: WILDLAND
FIRE NAME: CANYON	OPERATIONAL PERIOD: September 27 07:00-07:00
DATE ISSUED: September 26, 2017	TIME ISSUED: 20:00
UNIT: Orange County	SIGNED: 
	Typed/printed: FBAN Stephen Volmer

INPUTS

WEATHER SUMMARY: Winds will continue to change throughout the shift. Northeast winds 10-15mph will occur during the early morning hours, then shift to the Southwest 5-10mph beginning at 13:00. Ridge top winds will shift again around 02:00 back to the Northeast 8-15mph.

Daytime high temperature 82 degrees, decreasing to 65 degrees in the evening. Minimum relative humidity will be 20% during the day, and increase to 45% overnight with moderate recovery expected.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels have continued to dry out to critical levels over the last week, making ignition and fire spread easy when in alignment with wind, slope, and topography. Rapid rates of spread will be possible when all areas are in alignment. All brush components have been drought stressed over the past 5 years, leaving an abundance of dead material in each stand.

SPECIFIC:

GRASS: Rate of Spread....55 ft/min Flame Length....5 ft Spotting....1/4 mi Probability of Ignition 70%

GRASS SHRUB: Rate of Spread....40 ft/min Flame Length....7 ft Spotting....1/3 mi Probability of Ignition 70%

BRUSH: Rate of Spread....85 ft/min Flame Length....18 ft Spotting....1/2mi Probability of Ignition 70%

Fuels East and South of DIV B and DIV F have not burned in over 40 years, and are extremely volatile.

Fuels West and South of DIV O and DIV M have burned multiple times over the past 10 years and have been converted to a grass model.

Sunset 9/27...18:42 Sunrise 9/28...06:43

AIR OPERATIONS: Mixing begin at 10mph from the Northeast with a height of 1500' AGL, and switch to a West wind of 10 mph with a height of 7500' AGL in the late afternoon/winds. Winds will become turbulent during the directional shift over the ridgetops.

SAFETY

Steep drainages will aid in the spread and ignition of fire due to rolling material. Have lookouts posted.

Be alert for wind shifts throughout the day.

BRIEF ALL YOUR PERSONNEL ON THE CURRENT DAYS IAP BEFORE ENGAGING IN YOUR DIVISIONAL ASSIGNMENT.

- History of increased night activity and wind shifts in fire area.
- ESTABLISH: LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES AND SAFETY ZONES.

- Review WILDLAND URBAN INTERFACE FIREFIGHTING pgs. 12-16 of your IRPG.
- No PPE allowed in the eating areas. Wash hands regularly and always before entering the eating areas.
- If personnel get fatigued, but it's not a medical emergency, use line medics for evaluation and rehab in a shaded area on the fire line.
- Drive with head lights on and slow down.
- Units working on Hwy 91 must use code three lights while parked. Be aware of traffic passing in the open lane.

DEMOBILIZATION PLAN - SUMMARY

Canyon Incident
CA-ORC-105068

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

GENERAL GUIDELINES

- **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOBILIZATION UNIT.**
- Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours. Resources not able to arrive at their destination by 2200 hours may need to arrange to rest overnight.
- All government and hired vehicles leaving the incident will have a safety inspection.
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All incident personnel will receive and read the DMOB Safety Message before departing.

RESPONSIBILITIES

Unit Leaders will declare resources excess to their Section Chief. Section Chiefs will declare excess resources to the Plans Section Chief through the Resources Unit Leader. This should be done 36 hours in advance of anticipated release. Use the Declaration of Excess Resources Form or General Message Form (ICS-213) to list all excess resources. Include the Request #, ICS position, Name/ID, date and time of declared excess and time in which the resource will be eligible to leave. Send to the RESOURCE UNIT where the resource will be determined to be surplus to the incident. Only Surplus resources will report to the DEMOBILIZATION UNIT, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment.

RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. Hired personnel and equipment
4. Other agencies (USFS, BLM, etc.)
5. Out of region Cal Fire resources
6. Within Region Cal Fire resources
